Old White Pines from the Hicks Nurseries on the property of Mr. Fred Stadelman, Great Neck. These were planted for their beauty, not for any utilitarian purpose. Many people want pines to enjoy all summer and winter. Mr. Stadelman writes as follows:

"I cannot help writing to let you know how delighted we are with the white pines. Your men handled them with marvelous ease and skill."

HICKS NURSERIES WESTBURY, LONG ISLAND, NEW YORK 1925

FOREWORD

YOU and we are interested in the best development of your country place.

The cost of planting is low, you can get a collection of fruit, flowers and trees for five, ten or twenty dollars. A visit to Hicks Nurseries for two berry bushes, a grape vine or a hardy flower for thirty cents may thus be your best investment for food or beauty. A doctor said, "I get more fun coming to your nursery, getting an apple tree and planting it than I would having you do the whole place."

The sign, "Welcome to Hicks Nurseries," means you are welcome to drive or walk around any time. There are eight miles of roads. A former catalogue said, "Roam around, pick a flower here and a twig there to get acquainted, but do not pick half a \$10.00 rhododendron."

Another catalogue said, "Every family on quarter of an acre, best for children, best for business." How, can be learned by looking around the country, at the Hicks Nurseries, and by this and some of the other Hicks catalogues.

See the name on the stake, look up the price in this catalogue, pick out the plants you want, see a salesman or foreman, arrange to have it put in your car or delivered.

Arrange to have a salesman call and take your order or help you stake or sketch the arrangement of your garden and orchard.

HICKS NURSERIES

WESTBURY, L. I. Telephone 68, Westbury

Almost everything comes up with a clump of dirt on theroots. It can be wrapped in paper, burlap, paper pot, strawberry box or put direct into the large boxes in your car. Bring some fruit boxes and fiberboard boxes and get more for your money.

Bundle of fruit trees with the roots in mud, straw and burlap.

Tree is loaded on a truck by roller skids and laid down to go under wires. It is unloaded by standing it up and sliding it off on your grounds. It may weigh five or ten tons. The Hicks tree-moving crews handle it as easily as a safe is put into a bank. For shade trees 8 to 30 years old this way gives you the most for your investment any time in spring, summer or autumn. planting and transportation of replaced trees is borne by the purchaser.

PRICES, DELIVERY, PACKING

The prices in this list are for trees and plants dug and loaded at our nurseries. On request we shall be pleased to estimate the cost of delivery or the cost of freight or express. Five plants are sold at the 10 rate and 50 at the 100 rate.

All packing will be charged for at cost.

All packing will be charged for at cost.

SUMMER PLANTING

Summer planting is practical with over from the Hicks Nurseries. The fun of Summar years of waiting make them a straight and spread.

ARROWWOOD

Big shrubs like this are available by the thousands in the summer. They are broad and bushy because they were cut back a few years ago. They hold a big ball of peaty soil. Give them a drink occasionally and you save time and money and have plants that will harmonize because they are native; economical because you pay only plants and years of waiting make them cheapest for height and spread. seeing, wanting, having and enjoying is yours without remembering until next season. Summer planting is economical.

Large evergreen prepared for planting any time of the year. Some are root pruned several years previous to make more small feeding roots in the ball.

ARROWWOOD

You can carry some in pots and some have a fibrous root system which will hold a clump of soil without wrapping. This is particularly true of Rhododendrons and Azaleas, of which you can see tens of thousands of little plants just right for economical planting in summer.

It is a simple matter to tie the roots in burlap or sew them, as opposite. Another system is Hicks platforms and canvas that will hold balls of earth sixteen feet in diam-eter and three feet deep.

Shrubs in the nursery can have a ball of earth sewed in burlap.

Scotch Pine with laurel and rhododendron underneath. View in the garden of Mr. Vincent Park, Great Neck, L. 1. The trees and shrubs from Hicks Nurseries were used to enclose this lovely garden. A stroll around the place shows new pictures at frequent intervals.

Shade Trees

APLES are broad shouldered trees, the Norway and Red being round headed, with the Sugar upright ovate. They make cool, shaded lawns, walks, playgrounds, and create the setting for a new house. For time-saving Norway and Red Maples 20 to 35 years old, see *Home Landscapes* stock list, and come and see the trees.

Norway Maple. It is fun to pick them out.

Dog-

Hornbeam, beech-like trees for a pleached alley.

Tall, old beech trees from the Hicks Nurseries make an effective screen even in winter, with bright russet leaves. Residence of Mr. B. Blackwell, Plandome, L. I.

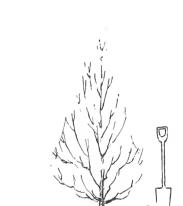

BEECH. Lighten up your woodland with a grove of Beech. The repose and dignity of old Beech can be yours in these trees. Make a grove of low branched trees to shut out the street. A hedge will divide one out-door room from another. Mix them with pine, hemlock, oak, and dogwood. Hedges of beech and hornbeam trimmed for vertical walls 16 to 20 feet high and as many years old are ready to wall your garden, laundry yard or formal garden.

FLOWERING CRAB APPLE. Malus. We all love the old apple trees for pink blossoms, fragrant perfume, and broad, hovering branches. They will make beautiful domes eight feet high and twelve feet broad in half a dozen years. Birds and you can eat the frozen fruit. Red vein crab has red foliage like the blood leaf Japanese maple.

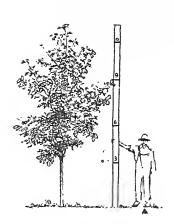

Height										Each
3-5 fee t										\$2.50

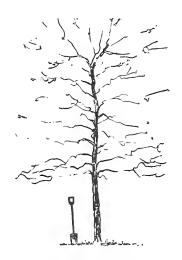

American Beech, grown as perfectly as possible.

English Beech—Nine feet.

Oak trees fourteen years old. Such trees delivered with ball of earth give immediate results at moderate cost.

Oak trees, twenty years old, give cool shade and dignified landscape.

Linden, showing broad, shady top. These and other shade trees can be planted all summer.

Simplicity is not carried to the extreme in this foundation of Japanese Yew, flat form, at the edge of the pavement terrace, and the taller Japanese Yew and other evergreens at the corners. Both the house and the planting show good taste in architecture. Complexity, confusion and too much contrast is carried to the extreme around many houses.

OAKS. The highest beauty and usefulness of a region is in what nature has put there. Oaks predominate on Long Island. You enthuse in May for the pale gray of the Oak leaves when they are the size of a squirrel's ear, and again in autumn for the blaze of scarlet and crimson. Your oak enthusiasm can revel in the collection at the Hicks Nurseries. Oaks 20 to 50 years old are waiting your selection.

The foundation planting at the residence of Mr. Pelham, Great Neck. Japanese Yew, Pfitzers Juniper, Japanese Spurge make a dignified composition that is good the year round, and will not soon close the windows. The path border is dwarf Japanese Yew.

Evergreens

OME and see the greenhouses, irrigated and shaded beds and the acres of baby evergreens. Buy them at 50 cents and have the fun of growing the common, the beautiful, the new and the rare. We have greatly extended the list of good plants available.

Firs are Christmas trees, tall and spiry, with balsam fragrance. A fundamental idea of a garden is enclosure. These tall trees can be part of your enclosing wall of green. For a community Christmas tree there are firs and spruce 20 feet high.

NIKKO Fir—Abies brachyphylla
Height Each
10-12 feet
White Fir—Abies concolor—Blue-green foliage, very broad and
solid trees.
Height
3 feet
5 feet
8-10 feet
JAPANESE CYPRESS are not expensive and you can buy them in
any size. Small plants for small gardens, and green plants for all winter
landscape are now very popular. Foundation planting in the right way

should use increasing quantities of the dark green and dwarf kinds.

Dwarf Retinospora—Chamaecyparis obtusa gracilis nana—Heirlooms of the Iapanese.

charming.	
Height Each	
$1\frac{1}{2}$ -2 feet	
JUNIPERS. You can classify the Junipers as exclamation	points,
cushions, and the carpet form. The exclamation points are the Red	Cedar,
Swedish Juniper, Needle Juniper, and Juniperus stricta glauca. The capped are the Common Juniper and Pfitzers Juniper. The carpet	ushion
shaped are the Common Juniper and Pfitzers Juniper. The carpet	are the

prostrate and trailing forms. This list is a few of the many hardy, beautiful and little known kinds you will find in the Hicks Nurseries

and little known kinds you will find in the Hicks Nurseries.
Pfitzers Juniper—Juniperus chinensis pfitzeriana.
Height Each 1½ feet spread
Common Juniper—Juniperus communis.
Height Each 1½ feet spread
Meyers Juniper-Juniperus squamata meyeri-Blue, tinged with red
Height Each $1-1\frac{1}{2}$ feet
Needle Juniper-Juniperus rigida-Use as a point at the house foun-
dation. Height Each 3-4 feet
Spiny Greek Juniper—Juniperus stricta glauca.
Height Each 8-12 inches
Red Cedar—Juniperus virginiana, 1 to 30 feet. Write for prices.

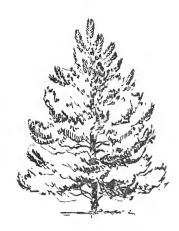

Let the foundation show in places, is the principle of the landscape architect, E. G. Davis, Ithaca, N. Y. Residence of Mr. George B. Hedges, Westbury.

SPRUCE, like the firs, have spiry tops. It is best to come and look at them, as names and descriptions are not equal to studying the many colors, blue and green, and sizes.

PINES should be most extensively planted of all evergreens on Long Island. They are native on Long Island, and they are more certain to reach a happy old age. If you know trees, you are undoubtedly a pine enthusiast, and we will help you all we can. Car loads and barge loads 15 to 30 years old are available.

Korean Pine—Pinus koraiensis.	
	Each 55.00
Mugho Pine—Pinus montana mughus. Cushion shape.	
1-1½ feet spread	Each 54.00 5.00
Austrian Pine—Pinus nigra austriaca. Best for seashore.	
Height 8-10 feet	Each 50.00 55.00
Macedonian Pine—Pinus peuce.	
6	Each 88.00 10.00

Scotch Pine give most cubic feet of immediate screen for the investment.

Blue green color.

White Pine twenty-four feet high, with laurel and rhododendron under.

Red Pine, six to eight feet high, are very solid, dark green, and hardy.

Japanese Yew, flat form. One of the best low dark green evergreens.

Dwarf Japanese Yew.

Hicks Japanese Yew.

American Arborvitae.

Red Pine—Pinus resinosa. Dark green and solid.
Height Each 6-8 feet
8-10 feet
White Pine—Pinus strobus. Best for screens.
Height Each 4-6 feet
6-8 feet
10-12 feet
12-14 feet
Height Each
8-10 feet
YEW. The beauty of the Yew is well known through the English
Yew. Unfortunately, equable climate and dull winter sun of England do
not permit the English Yew to be hardy here. The Japanese Yew is hardy, however, and similar in appearance, so makes a good substitute, even to
its bright red berries.
Japanese Yew—Taxus cuspidata-capitata (upright) form—Shaped like a Spruce or Fir.
Length Each 1-1½ feet
2-3 feet
Japanese Yew—Taxus cuspidata (flat form).
Height Each 12 inches by 12 inches
1½ feet by 1½ feet
Dwarf Japanese Yew—Taxus cuspidata nana brevifolia—Get several
for your evergreen garden and for the foundation planting.
Height Each 8-10 inches
1 foot by $1\frac{1}{2}$ feet
Hicks Japanese Yew—Taxus media hicksii. Height Each
$1-1\frac{1}{2}$ feet
ARBORVITAE is a fast growing plant, has graceful foliage of a
good green color in summer, and dull green tinged with brown in winter.
American Arborvitae—Thuya occidentalis—For foundation planting. Height 3-4 feet
Booth's Arborvitae—Thuya occidentalis boothi—A compact dark
green globe for foundation planting and low hedges to be used for garden
border. Height Each
$1-1\frac{1}{2}$ feet
Pyramidal Douglas Arborvitae—Thuya occ. Douglasi pyramidalis. Height Each 11/2 for
1½-2 feet
Height Each
1-1½ feet
HEMLOCK is a graceful dark green tree that likes the cool north
slopes of the mountains and shelter of other trees. Height Each
2-3 feet
3-4 feet
Hemlock Hedges. 600 feet long, 16 x 16 feet, 50 years, 400 feet
long, 8 x 6 feet.

Shrubs

POR fragrance and beauty of flower, Azaleas, Lilacs, Forsythia, Weigelia, and Deutzia. Strong growing plants to make mass foliage are Blueberry, Viburnums, Dogwood, Syringa, and Honeysuckle. Berry-bearing shrubs for fall and winter are Chokeberries, Viburnums, Honeysuckle, Dogwood, Barberries, Snowberries, and a host of others. Pick branches of foliage and flowers to study. You will find it the cheapest and in many respects the best way to develop the beauty and seclusion of your country home.

Aronia arbutifolia—Red Chokeberry. Feeds the birds in late winter. Height, 2-3 feet Each, \$1.00 Per Ten, \$9.00
Aronia melanocarpa—Black chokeberry—Plant by the thousand. Height, 2-3 feet Each, \$0.75 Per Ten, \$6.50
Azalea hinodigiri—Hinodegiri Azalea—Brilliant scarlet in early May, Height, 8-10 inches
Azalea japonica—Lemon yellow. Height, 12-18 inches
Azalea kaempferi—Torch Azalea—Orange—Plant in the woods. Height, 1-1½ feet
Azalea nudiflora—Pinxterbloom—Wild pink azaleas are widely scattered over Long Island on shady cool slopes.
Height, 2 feet
Azalea viscosa—Swamp Azalea—Sturdy shrubs with big balls of earth. We can supply collected plants by the thousands. Tell us length and height of border you want for estimate. White tinged with pink, June and July. Height, 2-3 feet
Berberis thunbergi—Japanese Barberry. Height, 1-1½ feet . Each, \$0.35 . Per Ten, \$3.00 . Per Hundred, \$20.00
Clethra alnifolia—Summer Sweet—With the swamp azalea available in the same way. Height, 2-3 feet Each, \$0.75 Per Ten, \$6.50
Cornus mas—Cornelian Cherry—Bright yellow, before forsythia, Height, 2-3 feet Each, \$0.75 Per Ten, \$6.50
Deutzia magnifica—A sturdy shrub soon six feet, white, May, used for hedges and screens.
Height, 2-3 feet Each, \$0.75 Per Ten, \$6.50 Euonymous alatus—Winged Euonymous. Height, 2-3 feet
Forsythia fortunei—Golden Bell—The first big show of spring, used
for wild banks and tall screens. Height, 3-4 feet Each, \$0.75 Per Ten, \$6.50
Hamamelis virginiana—Common Witch Hazel—Yellow, December. Height, 2-3 feet Each, \$0.75 Per Ten, \$6.50
Hibiscus syriacus—Rose of Sharon—Hollyhock-like flowers, pink and white, July. Height, 2-3 feet Each, \$0.75 Per Ten, \$6.50
Hydrangea arborescens—Hills of Snow—use for border or hedge. Height, 1-2 feet Each, \$0.75 Per Ten, \$6.50

High Bush Blueberry. Wide heavy balls of earth and big broad shouldered shrubs that give the most in time saving foliage. Beautiful autumn foliage. Sturdy oak like branches. Use truckloads for tall screening, hedges, and underplanting. Plant all summer.

Arrowwood. Plants offered are now bigger then this picture, six to seven feet high, and nearly as wide. The big ball of earth on the roots makes them economical because you do not have to wait several years. See page 3.

Hydrangea paniculata grandiflora—Hydrangea Peegee. Height, 2-3 feet Each, \$0.75 Per Ten, \$6.50
Ilex verticillata—Common Winterberry—Hollyberries all winter. Height, 2-3 feet Each, \$0.50 Per Ten, \$4.50
Ligistrum ovalifolium—California Privet—For hedges, plant one
foot apart.
Height, 2-3 feet . Each, \$0.25 Per Ten, \$2.00 Per Hundred, \$15.00 3 year bushy.
Lonicera tatarica—Tartarian Honeysuckle—Fragrant, pink and white, May, currant-like fruit for the birds in July.
Height, 2-3 feet Each, \$0.75 Per Ten, \$6.50
Philadelphus coronarius—Sweet Mock Orange—The memory of this
should lead you to plant in quantity for fragrance and for tall screens.
Height, 2-3 feet Each, \$0.75 Per Ten, \$6.50
Prunus triloba—Double Flowering Plum—Pink roses in early May.
Height, 2-3 feet Each, \$1.50 Per Ten, \$12.50
Rhodotypos kerrioides—Jet Bead.
Height, 2-3 feet Each, \$0.75 Per Ten, \$6.50
Spirea thunbergi—Thunberg Spirea.
Height, 1½-2 feet Each, \$0.50 Per Ten, \$4.50 Spirea van houtei—Van Houtei Spirea—Elmshaped snowbanks,
eight feet for tall borders, at the corners of the house and hedges.
Height, 2-3 feet Each, \$0.75 Per Ten, \$6.50
Symplocus paniculata—Asiatic Sweetleaf—Robins egg blue berries.
Height, 2-3 feet Each, \$2.00
Symphoricarpos racemosus—Snowberry. Big, white, September.
Height, 2-3 feet Each, \$0.50 Per Ten, \$4.50
Height, 2-3 feet Each, \$0.50 Per Ten, \$4.50 Symphoricarpos vulgaris — Coralberry — A tangle, spreading like
strawberries for borders and banks.
Height, 1½-2 feet Each, \$0.50 Per Ten, \$4.50
Syringa vulgaris, Common Lilac—You remember the fragrance.
Height, 2-3 feet Each, \$1.75 Per Ten, \$15.00
Vaccinium corymbosum—High bush blueberry—The best food and
the best big shrub available in lots of 10,000, with big balls of earth.
Height, 2-3 feet Each, \$1.50 Per Ten, \$12.50
Viburnum dentatum—Arrowwood—Available, like the last, up to eight feet; use both for economy, and beauty and privacy.
Height, 2-3 feet Each, \$0.75 Per Ten, \$6.50
Viburnum dilitatum—Japanese Bush Cranberry—Bright red all
winter, edible.
Height, 2-3 feet Each, \$1.00 Per Ten, \$9.00
Weigelia rosea—Pink bells in rhododendron time.
Height, 3-4 feet Each, \$0.75 Per Ten, \$6.50

Broad Leaved Evergreens

WITH broad leaved evergreens Long Island has its greatest opportunity and greatest need for beautifying the landscape. It is especially favorable to broad leaved evergreens, because the climate near the ocean is moist. Where it is protected from wind, as around the house foundation, under your shrubs and trees and in the woods, they are sure to be happy and beautiful. The soil that is open and porous, as our prevailing sandy soil, suits them. The plants themselves tell you how to arrange, how to tuck leaves around them. Come and see the following and many others. You can practice the sport and art of gardening all summer, for they come up with a little ball of felt-like roots. Economy is in these little plants; you had best get them by the hundred, with a few to bloom this year. Redecorate your landscape, which may be dull and commonplace.

Berberis verruculosa — Warty Barberry — New from China—red,
bronze and silver, for foundation planting, yellow flowers.
Height, 6-8 inches
Calluna—Scotch Heatner in variety—Pink and white bells, green or
red foliage, plant it near the shore or on sandy hills. Feather-down your shrubs and evergreens in the flower garden and rock garden.
Height, 3-6 inches Each, \$0.75
Cotoneaster horizontalis—Rock Cotoneaster—Bright red apple fruits.
3 in pots
Euonymous—Wintercreepers in variety—Carpet the woods, use as a
hardy substitute for English Ivy.
Height, 6-12 inches Each, \$0.75
Ilex crenata—Japanese Holly—Box-like foliage with black berries.
Height, 1-1½ feet
Ilex glabra—Inkberry Holly—Native on Long Island, a rounded
bush with black berries.
Height, 8-12 inches
Ilex opaca—American Holly—Mix them in your woods, shrub border
and foundation.
Height, 2-3 feet
Kalmia latifolia—Mountain Laurel—Sweeps of pink in May, beautiful foliage all the year. Plant by the thousand any time.
Height, 1½-2 feet Each, \$2.50
Pachistima canbyi—Mountain Lover—Bronze red mat, six inches.
Height, 6 inches
Pachysandra terminalis—Japanese Pachysandra—Cover plant with laurel-like foliage.
Height Fork Por To-
Height Each Per Ten Per Hundred 3-5 inches \$0.35 \$2.00 \$18.00
Rhododendron—Cawtawbiense Hybrids—Select little seedlings, some
in flower, at fifty cents up.
Height, 2-3 feet Each, \$12.00
Rhododendron maximum—Rosebay Rhododendron.
Height, 1½-2 feet Each, \$3.00
Vince minor—Common Periwinkle (Myrtle) Evergreen cover plant.
Height Each Per Ten Per Hundred
Height Each Per Ten Per Hundred 3-inches \$0.30 \$2.50 \$20.00
D D1
Rare Plants
A C was home mored in this catalogue III also November 1
S you have noted in this catalogue, Hicks Nurseries is not the ordinary list but gives you better service in time-saving plants, native
plants that are sure to be happy, and in new, rare and beautiful plants. Cuts,
sketches and color plates can not convey their beauty adequately. The nursery
is open, you can roam around and get acquainted, whether in the long day-
light-saving evenings or on a holiday. Many are not listed.
Corylus colurna—Tree Hazel—From a tree in Highland Park,
Rochester, 25 feet high.
Height, 3 feet Each, \$2.00
The cotoneasters are a new group of shrubs from China giving the
joy of the apple, the hawthorn and the spirea, for they are one family. Grace-
ful sprays of white flowers in May and bright fruits in fall and winter. Good
foliage and vigorous growth.
Cotoneaster acutifolia—Peking cotoneaster—Black fruit, grows 12 feet.
Height
3 feet

We refer to the following, and many others.	Cotoneaster dielsiana—Diels cotoneaster—6 feet, crimson autumn foliage.
Mrs. H. Bachman,	Height, 2 feet
Douglas Manor	Cotoneaster faveolata—Pink flowers, scarlet autumn foliage. Height, 2-3 feet
Mrs. E. W. Marlow Douglaston	Cotoneaster multiflora var. calocarpa—Showy flowers, large red fruit. Height, 2-3 feet
Dr. P. G. Cole, Forest Hills	Cotoneaster nitens—Purplish black fruit.
Landscape Architects,	Height, 1-1½ feet
Olmsted Bros.	Height, 1½-2 feet Each, \$1.50
Mr. A. H. Vose Forest Hills	Cotoneaster simonsi—Simons Cotoneaster—4 feet, pink-white flowers,
Mr. H. Bendel Great Neck	reddish fruit, dark crimson autumn foliage. Height, 2-3 feet
Mrs. W. D. Campbell, Great Neck Mr. Chrysler Great Neck	Cotoneaster zabeli—Zabels Cotoneaster—Flowers pink, fruit red,
Mr. F. C. Naughton, Great Neck	6 feet, bright yellow autumn. Height, 2-3 feet
Mrs. A. Pelham Great Neck	Enkianthus campanulatus—Redvein Enkianthus—Like highbush
Mr. A. Richardson, Great Neck Mr. C. P. Townsend, Great Neck	huckleberry, pink bells in May. Height, 1-2 feet
Mr. W. F. Vreeland, Great Neck	Rosa hugonis—Father Hugos Rose—Mound of golden long before
Mrs. R. D. Wyckoff, Great Neck	other roses. 2 years
Landscape Architect, Clarence Fowler	Teucrium chamaedrys—Chamaedrys Germander—An evergreen mat
THE Towers, Jackson Heights,	with aromatic foliage for borders, banks, and rock garden. Pink flowers. Height, 3 inches
Landscape Architect,	πειεμι, η πειες
Zanasapo III omitos,	
Noel Chamberlin	Vines
*	YOU may say "Our place is all finished: There is no room." You can add vines to clamber over the trees and shrubs, to carpet the ground and hold the mulch of leaves, to hold a bank or just for their own beauty.

This condensed list contains but few of the many varieties offered. Achillea ptarmica—The Pearl—White buttons all summer, sod of green, for borders.

Aconitum—Monkshood—Tall purple in late autumn, rare. Althea—Hollyhocks—Stately plants growing up to six feet. Anchusa—Dropmore Bugloss—Wealth of blue in June and later.

Aquilegia—Columbine—Favorites in the garden and woods.

Asters glorify the autumn landscape. Many new varieties and colors. with large flowers.

Boltonia. White asters liked for backgrounds and extensive natural-

izing.

Campanula—Bellflower—Blue and white bells that are always decorative.

Chrysanthemums. Plant in the spring and re-decorate your garden when they bloom in autumn.

Delphinium—Larkspur—Pale blue, deep blue and purple.

Dianthus barbatus—Sweet William—Cheerful sweeps of pink for a small investment.

Dianthus deltoides—Maiden Pink—Good sod for dry banks. Dianthus plumarius—Grass Pink—Carnation-like blue foliage.

Digitalis—Foxglove—Purple, pink and white, three feet; plant hun-

dreds in woodland borders. English Daisy. The children delight to make their own gardens with

these.

Funkia-Hosta-Plantain lily.

Gaillardia—Blanket flower—Wide flash of yellow, orange and bronze.

Hemerocallis—Daylily—Tall stems and yellow flowers.

Iris, Japanese, German, Siberica and dwarf. Select and plant in bloom. Mallow. Decorate the meadows with these. Gigantic, red flowers.

Paeony. An old garden favorite.
Phlox. Pink, salmon, white—all summer. Select in bloom.
Platycodon—Balloon flower—White, blue. Campanula-like flowers.

Primrose, for borders and naturalizing.

Salvia Azurea—Azurea sage—Blue, 3 feet, August. Sedum—Stonecrop—In variety for rocks and sandy banks.

Stokesia laevis-Stokes Aster-Blue, all summer.

Sweeps of color that take care of themselves can be achieved by planting in your grounds with your knowledge, our knowledge of soil and exposure and our plants. It is a type of gardening that may become the best. You can start any time. It is not expensive.

Fruits

IF you want a place where you can come and get fruit and berries in good assortment whenever you think about it, Hicks Nursery is the place. You can put them in your car or tie them on the running board. The time of the year does not make 5% difference. Your car will get home quick enough to prevent all the leaves drying out, even in summer. When your neighbors have currants or apples you can plant them. The difficulties of spraying and fear of stealing is a lazy excuse for not growing your own.

The distance apart is not important; how much fruit you can grow on your area is a game that interests you and profits you. Water helps.

Apples 5-6 ft. 2 yr............\$.75 each \$6.50 per ten Dwarf Apples, 2 yr.....\$1.00 each \$9.00 per ten Large Sized Apples up to 8 inches in diameter. Select at the Nursery. Delicious.
